

QA Online

The latest system from Cyres enables Colposcopy Clinics to produce the QA Pre-Visit Dataset online – fast, accurately and efficiently.

Cyres QA Online offers Colposcopy Clinics a new way of generating the Pre-Visit Dataset. No more filling in pieces of paper; no longer do you have to manually work out the answers to complex questions about your data.

Now clinics have the opportunity to go online and use the latest technologies to produce the dataset automatically. Data will get pulled from the integrated Cyres database – so all you will have to do is edit any changes from previous submissions and click SUBMIT – to send the dataset as a PDF file to the QA.

Automated sections cover data for all the key areas:

- Workloads
- Diagnostics
- Treatments
- Follow Ups
- etc

The system has been developed in conjunction with the East of England Screening QA but in anticipation of each region have their own variants of the dataset it has been built with flexibility in mind – so new sections and questions can be added in as necessary.

For more information or to arrange a visit / system demonstration please contact Sebastian Brunt on 01223 655466 or via email: s.brunt@cyres.co.uk.
